

HERMES TRADER

Autonomous AI Trading Agent — Technical Write-Up

Alpaca AI Trading Agents Hackathon · August 2026 · github.com/lunarnodal/hermes-trader

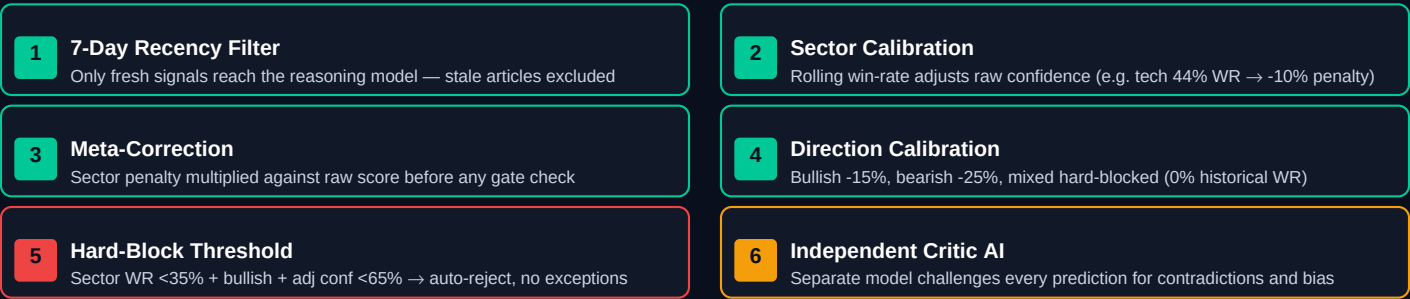

AI LOGIC & PIPELINE

Every 5 min: ingest + score + embed | 8AM ET: date-injected predictions | Post-mortem → 269 inference rules

Self-Learning: Failed trades trigger automated post-mortem → new inference rules written → sector fuel trim (LTFT/STFT) self-calibrates confidence penalties

RISK GATES — SIX PREDICTION LAYERS + SEVEN PORTFOLIO GATES

PORTFOLIO GATES (all 7 must pass):

Dynamic Fuel Trim: LTFT (long-term) absorbs STFT (short-term) nightly — penalties self-adjust based on recent outcomes without operator intervention
